ADDS VALUE TO THE PRODUCT

“ 100 Million Sack Capacity Per Year ”

## Why MESA SYNTHETIC?

### Step by Step on the Way to Becoming a World Brand!

Mesa Synthetic was established in 2021 with the vision of becoming a leading brand in the sector with its expert staff and experienced personnel.

By closely following sustainable production, technology and innovation, we provide common ground to all stakeholders. We aim to provide benefit.

#### Expert Staff

Mesa Synthetic was founded in 2021 with the vision of becoming a leading brand in the sector with its expert staff and experienced personnel.

#### Innovator

We produce with the latest technology machinery and industrial equipment.

#### Fast and Reliable

We manufacture in the most appropriate way to meet our customers' demands. Seamless export option from Turkey to all corners of the world.

**100+** We Serve Many Happy Customers.

## OUR PRODUCTS

### PP SYNTHETIC SACK

Polypropylene sack is more correctly called PP bag&sack PP woven bag&sack. PP sack is made of PP fabrics in different grades, patterns, prints, colors, sizes and capacities.

Due to its attractive features, PP bags have gained rapid popularity in the market and are now used in various industries. PP bags are used in foods, textiles, nuts, fertilizers, powders, cements, granulated chemicals and more.

It is ideal for industrial packaging, widely used for packaging.

### PP LAMINATED SACK

PP Laminated Sack is produced by covering the synthetic sack with lamination. The most important feature of the Laminated Sack, which is resistant to moisture and water, is that it does not leak out in powder products.

It can be produced as single-sided laminated or double-sided laminated.

### HARAL SACK

It is generally used in packaging and wrapping products such as cotton, yarn, fiber.

Haral Sack base can be produced with single or double stitching.

## OUR PRODUCTS

### GLASS SACK

Glass sack with its durable structure; it is one of the most preferred products for carrying vegetables such as potatoes and onions.

It is the most economical type of sack used in agricultural products.

Thanks to its transparent structure, it is convenient for visual inspection.

Its mouth is overlapped or hot cut.

### BIG BAG SACK

Big Bags are large sacks made of laminated or non-laminated fabrics formed by combining polypropylene (PP) ropes for the packaging, transportation and storage of powder and granular products, allowing the carrying of between 200 kg and 2,000 kg.

### NET SACK

Thanks to the holes on the net bag, it does not rot the product being transported.

It is used to transport fruits and vegetables such as potatoes, onions, peppers, eggplants.

It is packaged in bales of 1000 pieces.

### KRAFT SACK

It is prepared by applying paper coating to standard PP fabric surfaces in brown and white colors in the latest technology lamination line. It looks like a paper bag from the outside, and is made of PP fabric in terms of its durability and strength in terms of its internal structure.

Our new generation PP + KRAFT bag, which is expected to attract the attention of many sectors, is produced in our facility to meet the demands of our valued customers. Brown and white kraft alternatives are available. The bottom seam is made with single fold and chain stitch options, and the mouth is made with plain cold cut.

We also have printed manufacturing and bellows options when requested.

### BOPP SACK

BOPP Coated products can be printed in a quality close to reality. In this way, it attracts attention from many sectors. BOPP films prepared in line with customer demands are laminated and coated on PP synthetic bags in the desired standards.
